

RTS Ginger Drink

Introduction:

People have used ginger in cooking and medicine since ancient times. It is a popular home remedy for nausea, stomach pain, and other health issues.

People typically use fresh or dried ginger in cooking, and some take ginger supplements for their possible health benefits. Antioxidants and other nutrients in ginger may help prevent or treat arthritis, inflammation, and various types of infection. Researchers have also studied its potential to reduce the risk of diabetes, cancer, and other health problems. Therefore RTS ginger drink is an easy way of getting all the goodness of ginger in a busy life style. Further, it may be a good alternative for artificial beverages with no nutritive value at all.

Raw material:

Mature non fibrous ginger roots (Chinese variety)

Sugar

Potable water

Citric acid

Stabilizer

Permitted preservatives

Glass bottles

Machinery & Equipment:

SS, Knives /Ginger peeler

Sorting table

Pasteurizer

Bottle filler

Bottle capping machine

Plastic buckets

Date coding machine

Brix meter

PH meter

Thermometer

Micro scale – 0.01 -50g

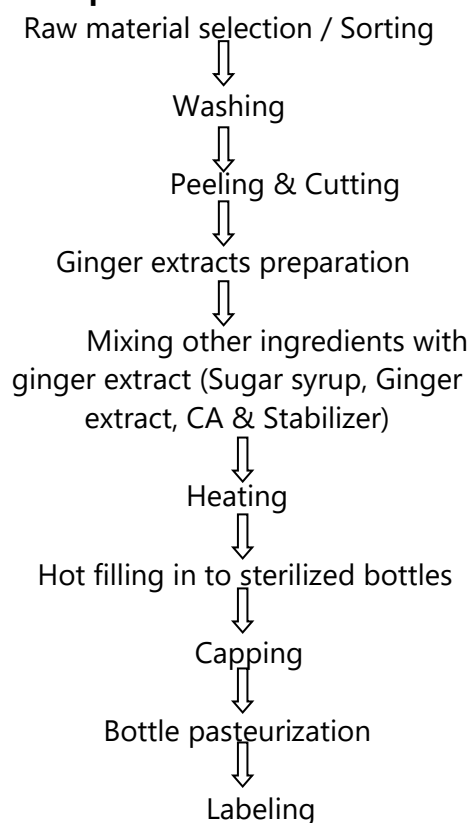

Electronic scale -5g-5 Kg

Investment for machinery:

Around Rs. 0.5Mn

Production process:
